INTRODUCTION

Scholarships and study trips might be a special opportunity in the life and professional development of young people. Therefore it is essential to choose a country that has outstanding results in the field of education and research and its culture is rather different from the applicant's home culture. Hungary is one of the most attractive destinations for those who wish to study abroad. Lying in the heart of Europe, Hungary is famous for its hospitality and friendliness in harmony with its ancient eastern traditions. Hungary is renowned for a particular language with a unique rhythm, special music, folk art, architecture as well as its long traditions in science, education and arts. There is hardly anyone who is not familiar with Liszt, Bartók and Kodály's music, János Irinyi's matches, László Bíró's ball pen, János Bolyai's non-Euclidean geometry, Albert Szent-Györgyi's vitamin C, László Moholy-Nagy's revolutionary work activity in the field of visual arts, János Neumann's computer, Dénes Gábor's hologram, Endre Papp's hybrid maize, Ernő Rubik's magic cube or Ignáz Semmelweis' mother-saving theory on the use of hand disinfection, only to mention a few famous Hungarian "inventions".

Budapest is one of the most beautiful capitals in the world with special architecture, a great amount of protected area as part of the World Heritage, with the Blue Danube, mountains, Europe's longest karst cave, with so many thermal spas, Turkish and Roman monuments and a city of ruins rivaling Pompei. The Hungarian equestrian culture originating from the ancient steppe, the Hungarian fishing industry, livestock, agriculture and the country's tourist attractions are abundant in surprises for everybody.

Lake Balaton, the region's largest sweet water lake, the first museum of golden artifacts, cafés competing with those in Paris and Vienna, retro pubs, flea markets, festivals and museums are inviting visitors.

Hungarian higher education institutions have been receiving foreign students for more than a hundred years. Degrees obtained in Hungary are accepted and appreciated worldwide. For many decades Hungarian universities and research institutes have been participating in international co-operations in all fields of science and arts.

Come and study or do research in Hungary and thus not only develop your professional skills but also gain unforgettable experience.
